Here is an exciting new survey of more than 30 young photographers from 14 countries who will have a pivotal role in shaping the fashion of the future. From Axel Hoedts bold graphic experimentation and fascination with traditional costume, to the colour-saturated, hyperreal images by Daniel Jackson, or the cool, neutral aesthetic of Hanna Putzs photographs, the work is diverse, striking, sometimes shocking, but, like all great photography, utterly memorable. Unlike recent books on fashion photography, which inevitably bring together the established names whose work already appears widely in international fashion magazines, this book embraces the fashion worlds obsession with freshness and youth: it looks beyond what is now and showcases what comes next. An introduction by the author and texts on each photographer are also featured. Download and Read Online Fashion Photography next : Edition en anglais Magdalene Keaney, Eleanor Weber #3BMA8XUN4G1
